

sustainability policy

Scope

atNorth's sustainability policy outlines our responsibilities to the environment, society and the economy and applies to all atNorth's operation and office areas.

The policy is followed up with actions we will take at all levels of operation, with measured accountability and transparency, to ensure long-term, sustainable business growth with the community and environment.

The policy is reviewed annually by the atNorth's executive board. The CEO is responsible for the sustainability policy, which is published on the company's website and internal website.s own prerequisites. By this it is ensured that the Human capital of the company is best utilized.

Dependable in climate-first matters

Using energy from only renewable sources in all our operations is a key step to maintain low GHG emission and reduce overall carbon footprint.

- Ensure efficient energy usage
- Strong climate policy that will lead us towards our sustainability goals
- Calculate, report and assess renewable energy usage
- Ensure climate action transparency
- Assess climate risk with standardized tier protocols

Enabling a circular economy

Minimizing all waste is a critical initiative for atNorth as well as continuing to drive innovation and deploy circular economy principles.

- Set clear objectives towards minimizing our environmental impact and protecting the environment
- Collaborate with entrepreneurs and start-up companies to ensure the respectful use of resources
- Maximize resource use across all operations to support circular principles
- Maintain a low environmental impact at all our facilities
- Eliminate waste and reuse heat across all our operations where possible

Empowering the community

atNorth's mission is to build a sustainable business that contributes to the surrounding community.

- Ensure a safe workplace and contribute to the healthy development of employees
- Promote inclusion, diversity and equality
- Enable our people to seek knowledge and develop
- Engage with local communities

Integrity in all we do

Sustainability and innovation are our guiding principles. We will continue to innovate, develop and create a future proof de-carbonizing platform

- Maintain strong data security and privacy
- Ensure a strong Climate Risk Management framework is in place
- Conduct supplier evaluations
- Uphold the highest ethical standards and anticorruption procedures
- Support sustainable innovation within our sector
