DEN01

RFS Q4 2024

Built for high density workloads

atNorth’s first data center campus in Denmark is located in the Ballerup region, approx. 22km west of Copenhagen. The first phase will go live in Q4 2024 following a swift 12-month build.

Providing capacity of 30MW for high-density workloads and located on a plot of 26,728 sqm with significant scalability options. DEN01 will feature best in class heat reuse technology and will also accommodate Direct Liquid Cooling (DLC) technology to support HPC and AI workloads in an energy efficient way.

It will also be ISO27001 and ISO14001 compliant and will adhere to Tier 3 standards.

Circular economy
Heat reuse to local district heating

Renewable energy sources
Abundant green, cost efficient-energy

High energy efficiency
Able to accommodate Direct Liquid Cooling technology

Excellent connectivity
Access to key network operators
Facility DEN01

- RFS ready Q4 2024
- Rack ready data halls
- Efficient free natural cooling
- Liquid cooling ready
- Renewable energy
- Heat re-use
- Carrier neutral
- 24/7/365 on-site security personnel

atNorth is a leading Pan-Nordic data center services company offering sustainable, cost-effective, and scalable co-location and high-performance computing services across Iceland, Sweden, Finland and Denmark. The company operates seven data centers in strategic locations across the Nordics, with three further sites under construction.

With sustainability at its core, atNorth’s data centers are powered by energy from renewable sources and support circular economy principles. All atNorth sites leverage innovative design, power efficiency, and intelligent operations to provide long-term infrastructure and flexible colocation deployments.

atNorth is headquartered in Reykjavik, Iceland, and is trusted by industry-leading organizations to operate their most critical workloads. The business was founded in 2009 and acquired by Partners Group in 2022.
